

VANI MENDA

Senior SDET | QA Lead | API, Automation & Performance Testing | AI-Augmented Quality Engineering

Visakhapatnam, India | +91-9440291964 | vaani.3103@gmail.com | linkedin.com/in/vani-m-3b6100163

PROFESSIONAL SUMMARY

Senior SDET / QA Lead with 11+ years of experience driving test strategy, automation architecture, and quality governance for enterprise web and API platforms across fintech, healthcare, and financial services domains. Deep hands-on expertise in API test automation (Karate, Postman, RestAssured) and performance engineering (JMeter, Gatling), with growing ownership of UI automation modernization using Playwright and Python. Actively integrates AI into the QA lifecycle — building an AI-powered test failure triage tool and leading an AI-assisted migration of legacy Selenium (Java) suites to Playwright (Python) — to accelerate automation delivery and reduce manual effort. Proven track record mentoring QA teams, owning CI/CD quality gates, and delivering zero-defect releases for regulated enterprise clients including Equifax.

TECHNICAL SKILLS

Automation & API	Selenium, Karate DSL, Playwright (Python – in progress), Cucumber, Postman, RestAssured, Bruno, WebdriverIO
Performance Testing	JMeter, Gatling, k6 — load, stress, endurance testing & SLA definition
AI-Augmented QA	AI-assisted Selenium→Playwright/Python migration; Claude API-based test failure analyzer (root cause analysis, fix suggestions, priority triage)
Languages	Java, Python (in progress), TypeScript, SQL
CI/CD & Cloud	Jenkins, GitHub Actions, GCP, AWS S3
Test Mgmt & Tools	Zephyr, Jira, Maven, Git, GitHub, Bitbucket, DataDog
Methodologies	Agile, Scrum, SAFe PI Planning, BDD, TDD

PROFESSIONAL EXPERIENCE

Senior Test Engineer (Lead SDET) | Sails Software — Equifax (UK & US) Jun 2023 – Present

- Lead end-to-end QA for two Equifax platforms (UK Employment Verification and Forms HQ Cloud Compliance), owning test strategy, planning, and execution across functional, regression, integration, and UAT phases.
- Currently leading an AI-assisted migration of the legacy Selenium (Java) automation suite to Playwright (Python), using AI-based code conversion to accelerate rewrite and cut manual migration effort.
- Built and use an AI-powered test failure analyzer (Claude API) that parses failure logs across Karate, Playwright, and Selenium to deliver root cause analysis, fix suggestions, and priority ratings.
- Promoted 56 NY State dynamic forms to production with zero defects; built a PDF document validation automation framework that cut execution time by 80%.
- Own CI/CD quality gates in Jenkins, lead defect triage calls, run performance test cycles (JMeter/Gatling), and trained 3 QEs on performance testing and DataDog monitoring.

Senior Quality Engineer L1 (Test Lead) | Publicis Sapient — Wellington Management LLC Sep 2022 – Jun 2023

- Led a team of 2 QA engineers on a Research Management Platform, mentoring on Karate API automation and converting business requirements into automated test suites.
- Owned load testing and SLA definition for core services; served as single point of contact for onshore teams during releases and production issues.

Senior Software Engineer (QA) | Tata Consultancy Services — DaVita Inc. Nov 2015 – Sep 2022

- Designed and executed Selenium WebDriver automation with complex dynamic XPath, plus SQL-based backend validation, for DaVita's revenue cycle management system.
- Owned regression and cross-browser testing across sprint cycles, ensuring accurate claims processing and revenue data integrity.

KEY ACHIEVEMENTS

- Zero-defect delivery:** promoted 56 NY State forms to production with no post-release defects — top quality record on the team.
- 80% faster execution:** built a PDF document validation automation framework that cut test execution time by 80%.
- AI-driven QA innovation:** built a Claude API-powered test failure triage tool and led AI-assisted migration from Selenium/Java to Playwright/Python.
- Cross-team leadership:** led QA for a UK-based Equifax employment verification platform and mentored teams on Karate & performance testing.
